Education

Gymnasium Schillerschulle (2022)

Technical studying(Computer,Electronic,General Technic)

Grade: VKL3 (May - July), 8th (September - Present)

Experience

Artive Tech – Budapest, Hungary
Artive is an innovational startup company that develops AI solutions for daily lives uses, it launched in December 2021 and in 3 weeks signed partnership with IBM and officially established, Artive constantly build AI products to facilitate people's lives through Automation, Computer Vision, Machine Learning and Natural Language Processing. Artive develops its AI models from scratch to tweak and customize every piece of its features that meets the clients' and customers' needs.
I am currently a student in Macedonia so my contract with Artive Tech is an intern contract, my title in the company is Web developer Intern.

Web developer intern – (02/2022- Present) – Budapest, Hungary

After three months of working on the web development team I got promoted to Lead UI / UX   Develeloper / Designer
- Developed the whole UI of chatbot interface
- Fixed design bugs on the web page and made it responsive
- Made a whole about page on the main project

Opera – Oslo, Norway

Opera is a multi-platform web browser developed by its namesake company Opera. The browser is based on Chromium, but distinguishes itself from other Chromium-based browsers (Chrome, Edge, etc.) through its user interface and other features. Opera was initially released on 10 April 1995, making it one of the oldest desktop web browsers still actively developed. It was commercial software for its first ten years and had its own proprietary layout engine, Presto. In 2013, it switched from the Presto engine to Chromium.

Technical Support Staff– (03/2022- 05/2022) – Oslo, Norway
- Knowledge about Web 3.0
- Dealing with Support Tickets
- Solid understanding about the Opera Crypto Browser

Technical Support Staff– (05/2022- 06/2022) – **Japan, Taiwan**

- Moderating their discord server with over than 4000 users
- Helping them to realise their plan for Gensokishi;
- Developing their MVP Crypto Stock bot with Python;

Projects

Cryptodash ReactJS Web Application

Built a web app that displays top 100 cryptocurrencies, the web app is advanced with multiple features like filtering, viewing stocks, mobile navigation and easy to use. The stats about the cryptocurrencies is fetched through RapidAPI through Coin Ranking API and Bing News Search. in order to build the website I used ReactJS, NodeJS, Redux Toolkit, Ant Design.

https://github.com/Ognema/cryptocurrencyapp

Tic Tac Toe

An tic-tac-toe game build with C++ that uses logic behind its code and it is a more intermidiate project to build.

https://github.com/ognemavl/-ic-Tac-Toe-Cpp/tree/main
